

State Revolving Fund Loan Programs Drinking Water, Wastewater, Nonpoint Source

PRELIMINARY DECISION OF CATEGORICAL EXCLUSION

TO ALL INTERESTED CITIZENS, ORGANIZATIONS AND GOVERNMENT AGENCIES:

MICHIGAN CITY SANITARY DISTRICT Spring Street Small Sewer Replacement SRF Project # WW 13 11 46 01

Date: May 13, 2013

Pursuant to IC 4-4-11, the State Revolving Fund (SRF) Loan Program has determined that the project described here and in the Michigan City Sanitary District's Preliminary Engineering Report will have no substantial negative environmental impact. Therefore, the SRF is issuing a preliminary decision of Categorical Exclusion from the requirements of substantive environmental review.

How were environmental issues considered?

The National Environmental Policy Act requires agencies disbursing Federal funds to include environmental factors in the decision making process. A summary of the project is attached for your review. The SRF's preliminary review has found that the proposed project does not require the preparation of either an Environmental Assessment or Environmental Impact Statement.

Why is additional environmental review not required?

Our environmental review has concluded that significant environmental impacts will not result from the proposed action.

How do I submit comments?

Comments can be submitted to:

Max Henschen, Senior Environmental Manager

CATEGORICAL EXCLUSION

I. PROJECT IDENTIFICATION

Project Name and Address: **Spring Street Small Sewer Replacement**
Michigan City Sanitary District
1100 E. Eighth Street
Michigan City, IN 46360

SRF Project Number: WW13 11 46 01

Authorized Representative: Michael Kuss, General Manager

II. PROJECT LOCATION

Michigan City is located in LaPorte County in northeast Indiana. The Spring Street small sewer replacement project is located between 11th and Detroit streets and in the alley between Spring and Cedar streets in Michigan Township, Michigan City West USGS 7.5' quadrangle, T38N, R4W, Section 29. See Figure 1. All work will occur within the previously disturbed areas.

III. PROJECT NEED AND PURPOSE

Two 8-inch sanitary sewers in Spring Street between 11th Street and Detroit Street are structurally deteriorated and must be replaced. The 6-inch sanitary sewer in an alley between Spring Street and Cedar Street is undersized and contributes to sewer backups. The District will abandon the 8-inch sewers in Spring Street and install approximately 537 feet of new 8-inch sanitary sewer with five manholes. The District will replace the 6-inch sewer in the alley between Spring Street and Cedar Street with approximately 291 feet of 8-inch sewer and four manholes.

IV. ESTIMATED PROJECT COST AND FUNDING

The as-bid cost of the project is \$374,472, including non-construction cost. The District will finance the project with a 20-year loan from the SRF program at an interest rate to be determined at the time of loan closing. Monthly user rates and charges may need to be analyzed to determine if adjustments are required for loan repayment.

V. ENVIRONMENTAL IMPACTS OF THE FEASIBLE ALTERNATIVES

The project will not affect wetlands, wooded areas, floodplains or prime farmland. Construction and operation of the project will not alter, demolish or remove historic properties; see Figure 2. If any visual or audible impacts to historic properties occur, they will be temporary and will not alter the characteristics that qualify such properties for inclusion in or eligibility for the National Register of Historic Places. The SRF's finding pursuant to the Section 106 of the National Historic Preservation Act, is: "no historic properties affected."

VI. PUBLIC PARTICIPATION

The proposed project was mentioned at a properly public noticed Public Hearing on December 19, 2012. Members of the public did not comment at the Hearing, and the District did not receive written comments in the 5-day post-Hearing period.
